

Internet Intelligence Training Level 2

Participants will be introduced to advance searching and evidence collection techniques expanding upon the lessons learned in the Level I course. Web 2.0 and new technology has changed the way we conduct business today.

This course will walk you through practical examinations using real life examples in hands-on exercises for locating information on individuals and companies. Providing a comprehensive understanding of how to search bulletin boards, newsgroups, media and photos and identify corporate affiliations, licenses and professional affiliations in addition to obtain larger amounts of relevant information faster.

A laptop with an internet connection will be provided. (DCJS #11-4318)
